BAILUN WU, EIT

+1(415) 837-8536 | bwu200276@g.ucla.edu | San Francisco, CA | Alexwu0706.github.io | https://www.linkedin.com/in/bailun-wu/

Education

University of California, Los Angeles (UCLA) **Los Angeles, CA**

---*B.S., Electrical Engineering* (Sept 2022 - Dec 2024)

- GPA: 3.73
- Honor: Dean's List (Good Standing)

Certifications

Engineering in Training (EIT) Certification **September 2024**

---Issued by the Board for Professional Engineers, Land Surveyors, and Geologists, License #**182862**

Technical Skills

Programming Language: Matlab; Python; C/C++; HTML; Github; CSS

Prototyping: Experienced with Arduino; Oscilloscope; Function Generator; Multimeter; Microcontroller.

Software: Advanced in Microsoft Excel, Office & PowerPoint; Autodesk softwares

Course: Advanced Circuit Analysis; System and Signal; Principles of Feedback Control; Data Structures and Algorithms; Data Science; Machine Learning; Electromagnetism; Principles of Power System.

Work Experience

UVFAB Systems, Inc. **Remote, United States**

---Electrical Engineering Intern (Mar 2024 -Aug 2024)

- Cable & Harness designing for AC modules/capital equipment / Sensors / Temp Controllers, digital timers, etc.
- Design electrical/electronic engineering assemblies, layouts/schematics and detailed drawings
- Preparing engineering specification documents, Test specifications and interface with other teams
- Coordinate the procurement and assembly of electrical/electronic components/equipment
- Perform engineering analysis on component failures and interact with vendors for resolution

Engineering Projects

Micromouse **Los Angeles, CA**

---UCLA IEEE Project (Oct 2022 - Sep 2023)

- Build a maze solving robot from scratch.
- PCB design and CAD Application.
- Program complex microcontrollers.
- Algorithm Implementation to solve the Maze

Path Following Robot Car **Los Angeles, CA**

---ECE3 Project (Oct 2022 - Dec 2022)

- Utilized the TI Robotics System Learning Kit to implement PID controls on a robotic car achieving 8.3 seconds on a 3.4 meter track.
- Developed code utilizing real-time phototransistor data to send updated movements to the car as a closed-loop feedback system.

Electrocardiogram **Los Angeles, CA**

--- ENGR 96E (Jan 2023 - Mar 2023)

- Use concepts and techniques in electrical circuit design and analysis, cardiac electrophysiology, biophysics, microcontrollers, and computer programming.
- Work in teams to design, construct, and test circuit boards capable of measuring human electrocardiograms by capturing data with microcontroller, with computer analysis and display.

Solar Powered Vehicle **Los Angeles, CA**

---UCLA IEEE Project (Oct 2023 - Aug 2024)

- Power system optimization with circuit analysis of the embedded circuit components (Passive circuit components).
- PCB Design and Solar Panel Application.
- Signal Processing for control system implementation
- Power factor Correction
